# White Folio

**Created :** September 24, 2010

**By:** Sara Presenti for Your Inspiration Web [<http://www.yourinspirationweb.com>]

**Contact Info:** [sara@mascaradesign.it](mailto:sara@mascaradesign.it)

## xhtml Structure

The template is composed by a single html page subdivided in four sections: the home page, a description page that I called "about", a page containing a photo gallery and a contact page with a contact form ready to use.

## Home page

## Replace the logo

The logo inserted in the theme is in the images folder (logo.gif) and it can be replaced directly in this folder or by modifying the path or the name of the image in the following code line:

```

```

## Add the links to the icons of the social networks

The icons of the social networks positioned on the right of the navigation menu can be linked to the respective profiles on twitter, to a possible rss function and to an e-mail address. Even the single icons can be modified, always replacing the images (images/icons) or changing the name or path of the images in the following code lines:

```
<a href="http://indirizzoprofilotwitter.it"></a>
```

## Set-up the slider

To set-up the slider correctly you have to follow these steps:

- 1- Insert the images you want to visualize in the slider in the *images* folder
- 2- Open the file *madrid.xml* and modify the paths /names of the images to load in the slider. The paths must always be specified in an absolute way, for example:

<http://www.indirizzotuosito.it/images/001.jpg>

```
<?xml version="1.0" encoding="utf-8"?>
<playlist version="1" xmlns="http://xspf.org/ns/0/">
  <trackList>

    <track>
      <location>http://www.yourinspirationweb.com/WhiteFolio/images/1.jpg</location>
    </track>

    <track>
      <location>http://www.yourinspirationweb.com/WhiteFolio/images/2.jpg</location>
    </track>

    <track>
      <location>http://www.yourinspirationweb.com/WhiteFolio/images/3.jpg</location>
    </track>

    <track>
      <location>http://www.yourinspirationweb.com/WhiteFolio/images/4.jpg</location>
    </track>

    <track>
      <location>http://www.yourinspirationweb.com/WhiteFolio/images/5.jpg</location>
    </track>

  </trackList>
</playlist>
```

- 3- In the *index.htm* page replace the absolute paths of the three files (*swfobject.js*, *imagerotator.swf* e *madrid.xml*) set in the example theme with the paths of the new site:

```

<!-- SLIDER -->
<div id="slider"><a href="http://www.macromedia.com/go/getflashplayer">Get the Flash Player</a> to see this rotator.<
<script type="text/javascript" src="http://www.yourinspirationweb.com/WhiteFolio/swfobject.js"></script>
<script type="text/javascript">
var sl = new SWFObject("http://www.yourinspirationweb.com/WhiteFolio/imagerotator.swf", "rotator", "940", "368", "7")
sl.addVariable("file", "http://www.yourinspirationweb.com/WhiteFolio/madrid.xml");
sl.addVariable("width", "940");
sl.addVariable("height", "368");
sl.addVariable("transition", "blocks");
sl.addVariable("shownavigation", "false");
sl.addParam("wmode", "opaque");
sl.write("slider");
</script>
<br/>

```

Example: <http://www.indirizzotuosito.it/imagerotator.swf>

- 4- Always in the *index.htm* set-up the dimensions of the images to put in the slider, as marked in the following image:

```

<!-- SLIDER -->
<div id="slider"><a href="http://www.macromedia.com/go/getflashplayer">Get the Flash Player</a> to see this rotator.<
<script type="text/javascript" src="http://www.yourinspirationweb.com/WhiteFolio/swfobject.js"></script>
<script type="text/javascript">
var sl = new SWFObject("http://www.yourinspirationweb.com/WhiteFolio/imagerotator.swf", "rotator", "940", "368", "7")
sl.addVariable("file", "http://www.yourinspirationweb.com/WhiteFolio/madrid.xml");
sl.addVariable("width", "940");
sl.addVariable("height", "368");
sl.addVariable("transition", "blocks");
sl.addVariable("shownavigation", "false");
sl.addParam("wmode", "opaque");
sl.write("slider");
</script>
<br/>

```

The first size (940) regards the width, the second one (368) the height.

- 5- The type of animation set-up in the theme is the "blocks" type, although this type of players allow to choose between different animated effects (*fade*, *bgfade*, *blocks*, *bubbles*, *circles*, *flash*, *fluids*, *lines* o *slowfade*) all of them very original and different between them. To modify this effect, in the *index.html* replace the parameter marked in the following screenshot with one of the other effects available.

```

sl.addVariable("width", "940");
sl.addVariable("height", "368");
sl.addVariable("transition", "blocks");
sl.addVariable("shownavigation", "false");
sl.addParam("wmode", "opaque");
sl.write("slider");
</script>
<br/>

<!-- END SLIDER -->

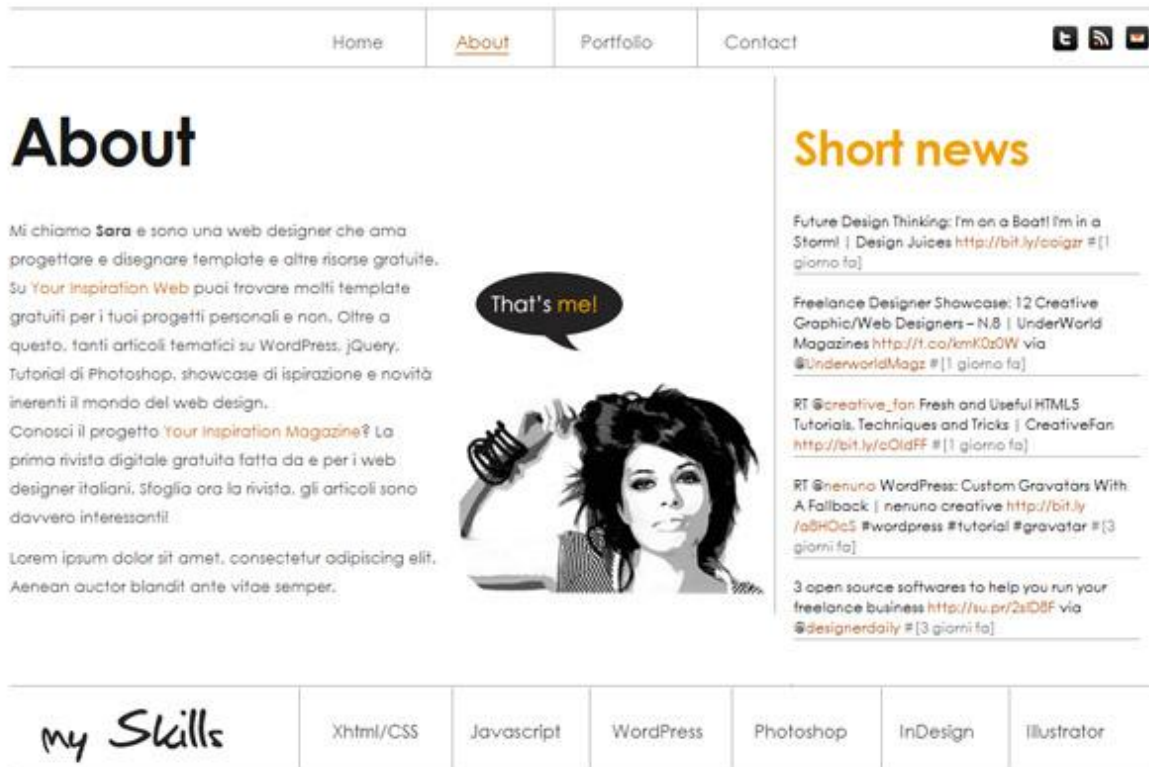

<!-- ABOUT -->
<div id="about">
  <!-- LOGO + NAV -->
  <div class="TopNavigation">
    <ul class="nav">

```

For more information about the potentialities and the characteristics of the flash player "Image Rotator" I send you back to the apposite [documentation page](#).

## About

The about page is subdivided in two sections: on the right the last messages published on twitter get visualized in a dynamic way, on the left a short descriptive text. Both sections can be easily modified.

## Set up the last tweets

In the right section of the about page it is possible to:

- 1- Modify the title of the section (in the present theme the title is *Short news*);
- 2- Set the Twitter account to link to the section (in the present theme it's YIW);
- 3- Set the numbers of tweets that you want to visualize (in the present theme it's 5)

```

<!-- SHORT NEWS FROM TWITTER -->
<div class="rightAbout">

  <h3>Short news</h3> 1

  <ul id="twitter_update_list">
    <li></li>
  </ul>

  <!-- START EMBED TWITTER -->
  <script src="js/twitter.js" type="text/javascript"></script>
  <script src="http://twitter.com/statuses/user_timeline/YIW.json?callback=twitterCallback&count=5">
  <!-- END EMBED TWITTER --> 2 3

</div>
<!-- END SHORT NEWS FROM TWITTER -->

```

## Modify the description

In the left section of the about page it's possible to modify:

- 1- The title of the section (in the present theme it's *About*);
- 2- The description text inside the paragraphs;

```

<!-- DESCRIPTION -->
<div class="leftAbout">

  <h2>About</h2> 1

  <p>
    Mi chiamo <strong>Sara</strong> e sono una web designer che ama progettare e disegnare template e altre
    risorse gratuite. Su <a href="http://www.yourinspirationweb.com/en/">Your Inspiration Web</a> puoi
    trovare molti template gratuiti per i tuoi progetti personali e non. Oltre a questo, tanti articoli tematici
    su WordPress, jQuery, Tutorial di Photoshop, showcase di ispirazione e novità inerenti il mondo del web design.
    <br/>
    Conosci il progetto <a href="http://www.yourinspiration-magazine.com">Your Inspiration Magazine</a>?
    La prima rivista digitale gratuita fatta da e per i web designer italiani. Sfoglia ora la rivista,
    gli articoli sono davvero interessanti!
  </p>

  <p>
    Lorem ipsum dolor sit amet, consectetur adipiscing elit. Aenean auctor blandit ante vitae semper.
  </p>

</div>
<!-- END DESCRIPTION -->

```

The class 'leftAbout' has as background image the illustration of a girl with a black cloud and a border on the right that serves as a separation for the two sections:

```
.leftAbout {float:left;width:640px;background:url(../images/me.jpg)
no-repeat bottom right;border-right:1px solid #b1b1b1;}
```

A padding has been assigned to the paragraph so that the text doesn't overlap with the image.

```
.leftAbout p {padding:0 280px 0 0;}
```

It's really simple to remove or replace the background image, all you need to do is modify the image in the images folder or modify the code in the lines written above.

## Modify the skills

The skills are inserted inside a dotted list, modifiable directly from the code:

```

<!-- SKILLS -->
<div id="skills">
  <ul>
    <li>Xhtml/CSS</li>
    <li>Javascript</li>
    <li>WordPress</li>
    <li>Photoshop</li>
    <li>InDesign</li>
    <li>Illustrator</li>
  </ul>
</div>
<!-- END SKILLS -->
</div>
<!-- END ABOUT -->

```

## Portfolio

## Portfolio

In questa pagina puoi inserire una gallery dei lavori che hai realizzato o, in alternativa, una semplice ed elegante gallery fotografica.

In the portfolio I integrated the Javascript [Gallerific](#) that allows us to visualize some thumbnails on the left and on the right the enlargement of the images inserted in the thumbnails. The script is very clean and elegant and easy to personalize.

The images to modify are in the folder *images/portfolio*, while the changes to make to the code of the page are the following ones:

```

<li>
  <a class="thumb" href="images/portfolio/005.big.jpg" title="Title #0">2
    3
  </a>
  <div class="caption">
    <div class="image-title">My Brochure</div>4
    <div class="image-desc">Inserisci qui una breve descrizione del progetto di cui sopra.</div>5
  </div>
</li>

<li>1
  <a class="thumb" href="images/portfolio/002.big.jpg" title="Title #1">
    
  </a>
  <div class="caption">
    <div class="image-title">My Portfolio</div>
    <div class="image-desc">Inserisci qui una breve descrizione del progetto di cui sopra.</div>
  </div>
</li>

```

- 1- The entire section that integrates a thumbnail and the related enlarged image is included inside the tag <li>, if I want to add a new work I have to copy and paste the entire section highlighted by the red border.
- 2- In this line you can modify the path of the big image;
- 3- In this line you can modify the path of the thumbnail;
- 4- Here you can put the title related to the image;
- 5- Here you can put a short descriptive text related to the image.

## Modify the testimonials

Every testimonial is inserted inside a paragraph with a class "quote" that will put graphic quotes on the right and a dotted border on the top. These setups can be modified with a stylesheet:

```
.quote {background:url(../images/quote.gif) no-repeat top left; padding: 20px 0 0 60px; border-top:1px dashed #b1b1b1;}
```

In the index.htm page it's possible to modify what follows:

```

</div>
<!-- END THUMB -->

<div style="clear: both;"></div>

<h3>Testimonials</h3>1

<p class="quote">
  E' stato un piacere lavorare con Tizia, si e' dimostrata molto professionale e al tempo stesso creativa, curiosa, viva!
  Il logo che mi ha progettato e' praticamente perfetto e mi rappresenta esattamente come desideravo. [ Ilenia Consalvo ]
</p>

<p class="quote">
  Tizia e' stata molto disponibile e attenta e mi ha messa subito a mio agio. Ha saputo capire quale proposta grafica era
  piu indicata alle mie esigenze e il risultato e' stato a dir poco sorprendente. Consiglio a tutti di affidarsi con
  completa fiducia a Tizia. [ <a href="#">Rita Covarrubias</a> ]
</p>2

</div>
<!-- END PORTFOLIO GALLERY -->

<!-- CONTACT -->
<div id="contact">

```

- 1- The title of the section (in the present theme it's *testimonials*);
- 2- The text inside the single paragraphs.

## Contacts

Home About Portfolio Contact   

# Contact

Sentiti libero di contattarmi quando vuoi per un preventivo gratuito, per richiedere qualsiasi informazione sulla mia metodologia di lavoro, o anche solo per farmi sapere che sei passato di qua. Utilizza il seguente modulo o, se preferisci, uno recapiti contrassegnati in questa pagina. Ti risponderò appena possibile!

Nome

E-Mail

Oggetto

Messaggio

Contattami attraverso uno dei seguenti social network:

**Twitter** [mascaradesign]

**FaceBook** [Tizia Calo]

**Skype** [mascarad]

O, se preferisci, contattami telefonicamente:

 **+39 0123 456 789** 

Ricordati che puoi richiedere un **preventivo gratuito e senza impegno** per la realizzazione o il restyling del tuo sito web. Contattami subito!

In the contact page I inserted a contact form on the right and a side section containing some contact information (socials, telephone number, etc.)

## Set-up the contact form

The contact form is already operative, with an error control in Javascript in the fields “name”, “e-mail” and “last name”. To set up your e-mail address, open the *config.php* file inside the folder *contact\_form* and replace the present e-mail address with the one to which you want to associate the contact form.

```
1 <?php
2 // To
3 define("WEBMASTER_EMAIL", 'sara@mascaradesign.it');
4 ?>
```

## Modify the contact information

The different contact information can be modified operating directly on the following code lines:

```
<!-- CONTACT INFO -->
<div id="contactInfo">
  <p>
    Contattami attraverso uno dei seguenti social network:
  </p>

  <p>
    <span class="bolder">Twitter</span> [mascaradesign]
  </p>

  <p>
    <span class="bolder">FaceBook</span> [Tizia Caio]
  </p>

  <p>
    <span class="bolder">Skype</span> [mascarad]
  </p>

  <p>
    O, se preferisci, contattami telefonicamente:
  </p>

  <p class="bolder">
    392/0123456
  </p>

  <p>
    Ricordati che puoi richiedere un <strong>preventivo gratuito e senza impegno</strong> per la realizzazione
    o il restyling del tuo sito web. Contattami subito!
  </p>
</div>
<!-- END CONTACT INFO -->
```

## Conclusions

I thank you for having downloaded this theme. You can freely use it for your projects, personal and non, if you prefer you can remove the copyright from the footer, even if we would like that you leave it, for a courtesy towards Your Inspiration Web, that intends to release periodically high quality resources like the one you just downloaded.

If you have problems with the personalization of the template I invite you to contact me at the e-mail address indicated on the first page of this manual.
